

where your data matters

Is poor data management putting your operations at risk?

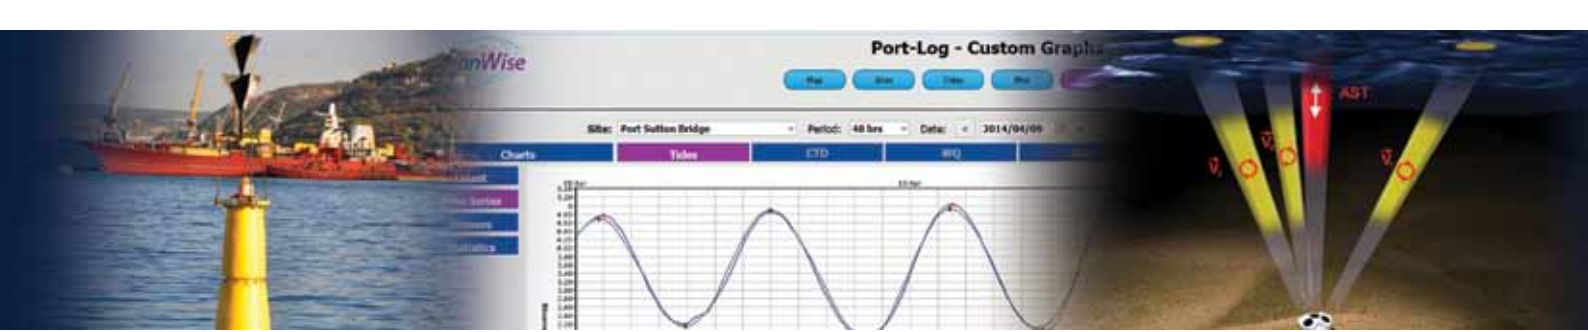

Managing a modern port demands fast and easy access to accurate maritime information so you can quickly visualise situations and make the right decisions.

OceanWise can help you modernise your approach to data management. We provide tools and expertise that streamline workflows and improve decision support.

“ We have replaced our old paper and spreadsheet based system with centralised data and information management and access. Working with **OceanWise** has transformed ABP’s work processes. ”

ABP Southampton, UK

Struggling with multiple data formats and complex monitoring requirements?

Frustrated that you never seem to have the information
you need, when you need it?

OceanWise can help you modernise your approach to data management. We provide tools and expertise that streamline workflows and improve decision support.

- Compliance and conservancy
- Maritime asset management
- Chart production, including Electronic Navigational Charts
- Tidal and weather monitoring

Working with us, you can be assured that you always have the right data in the right place at the right time, and in doing so, make your operations:

- Safer and more resilient, with deeper insight and improved decision-making
- Easier to manage, with modern and efficient tools
- Less costly, using best practice and streamlined processes

“**OceanWise’s** expertise, industry knowledge and software tools have significantly improved the way we work with our data. Being able to get detailed up-to-date information into our Portable Pilotage Units (PPUs) quickly has made us more confident in manoeuvring larger ships in confined spaces and in other pilotage operations.”

Peel Ports, UK.
